Orthopedic Surgery

Advanced Orthopedic Care for Better Movement and Quality of Life

At Cairo Hospital, we understand how bone and joint conditions can affect your mobility, independence, and everyday comfort. Our orthopedic surgery services focus on diagnosing and managing a wide range of musculoskeletal conditions through personalized surgical care.

From joint replacement to complex trauma reconstruction, our orthopedic team works to identify the most suitable treatment approach for each patient's needs.

Our Orthopedic Surgical Services

Knee and Hip Replacement

For patients experiencing advanced arthritis or severe joint damage, knee and hip replacement surgery may help reduce pain and improve mobility when non-surgical treatments are no longer sufficient.

Hand and Microsurgical Reconstruction

Specialized procedures address complex injuries and conditions involving the hands, including damage to bones, tendons, nerves, and surrounding tissues.

Foot and Ankle Surgery

Our orthopedic services include the assessment and surgical management of selected foot and ankle injuries, deformities, and conditions affecting movement and stability.

Complex Trauma Reconstruction

Severe fractures and complex orthopedic injuries may require reconstructive surgery or external fixation to support bone alignment and recovery.

When Should You See an Orthopedic Surgeon?

Persistent joint pain, restricted movement, recurring injuries, fractures, and physical deformities may require specialist assessment.

Why Choose Cairo Hospital?

Our approach combines medical expertise, individualized treatment planning, and coordinated rehabilitation support to guide patients through their orthopedic care journey.

Move toward better mobility. Book your orthopedic consultation at Cairo Hospital.

Orthobiologics – Stem Cell Regenerative Cellular Therapy (BMAC)

FROM YOUR BODY, BACK TO YOUR BODY.

Exploring Your Body's Own Biological Potential

At Cairo Hospital, we offer Bone Marrow Aspirate Concentrate (BMAC) therapy as part of our orthobiologic orthopedic services.

BMAC is a minimally invasive, patient-derived procedure that uses a concentrated preparation obtained from the patient's own bone marrow.

This preparation contains a mixture of biological components, including a small population of stem and progenitor cells, which are being investigated for their potential role in musculoskeletal care.

Our approach reflects a simple concept: **From Your Body, Back to Your Body.**

How Does BMAC Therapy Work?

Step 1 – Bone Marrow Collection

A sample of bone marrow is collected from the patient, usually from the pelvic bone, using an appropriate anesthetic technique.

Step 2 – Concentration Process

The sample is processed to concentrate selected cellular and biological components.

Step 3 – Targeted Application

The prepared concentrate is administered to the selected treatment area according to the patient's diagnosis and clinical plan.

Why Consider BMAC Therapy?

From Your Own Body

BMAC uses a preparation obtained from the patient's own bone marrow rather than donor-derived cells.

Minimally Invasive Approach

The procedure generally involves needle-based collection and administration rather than open surgery.

Potentially Shorter Recovery

Compared with major orthopedic surgery, the procedure itself may involve less downtime, although recovery varies by patient and condition.

Personalized Orthopedic Care

Every patient undergoes an assessment to determine whether the procedure is appropriate.

Exploring Biological Treatment Options

BMAC is part of an evolving field of orthobiologic medicine that continues to be studied for selected orthopedic conditions.

BMAC for Arthritis and Spondylosis

BMAC has been investigated for certain degenerative joint conditions, including knee osteoarthritis. However, its effectiveness remains uncertain, and it has not been established as a definitive cure for arthritis.

Evidence supporting BMAC for spondylosis is also insufficient to establish it as a routine treatment.

BMAC does not guarantee cartilage regeneration, permanent pain relief, or avoidance of future surgery.

Other Orthobiologic Services

Depending on the patient's condition, our orthopedic team may also discuss Platelet-Rich Plasma (PRP) and prolotherapy as separate treatment options.

Your Care at Cairo Hospital

Our specialists focus on accurate diagnosis, informed treatment decisions, and clear communication about potential benefits, limitations, and risks.

FROM YOUR BODY, BACK TO YOUR BODY.

Cairo Hospital – Exploring the Science of Healing From Within.

Book a consultation to learn whether BMAC-based orthopedic care may be suitable for you.

Diabetic Foot Clinic

Protecting Your Feet. Preserving Your Mobility.

Diabetes can affect the nerves, circulation, and skin of the feet, increasing the risk of wounds, infections, and complications that may affect mobility.

At Cairo Hospital, our Diabetic Foot Clinic provides specialized assessment, wound care, and preventive management to help patients protect their foot health.

Our Diabetic Foot Services

Diabetic Neuropathy Assessment

We assess symptoms such as numbness, tingling, burning sensations, and reduced sensitivity that may increase the risk of unnoticed injuries.

Advanced Wound Care

Our wound management approach may include appropriate dressings, wound cleaning, debridement, and monitoring for signs of infection.

Ulcer Prevention and Off-Loading

We help patients understand how pressure reduction, appropriate footwear, and regular foot examinations can support ulcer prevention and wound management.

Limb Preservation Care

Complex diabetic foot conditions may require coordinated care involving different medical specialists, with the aim of preventing complications and preserving function whenever possible.

Warning Signs You Should Never Ignore

- Persistent numbness or burning sensations.
- Open wounds or ulcers.
- Swelling, redness, or skin discoloration.
- Signs of infection or delayed wound healing.

Diabetic foot wounds can become serious quickly. New or worsening wounds should receive prompt medical attention.

Your Foot Health Matters

Early assessment, regular monitoring, and personalized care are essential components of diabetic foot management.

Protect your feet and your independence. Schedule a diabetic foot consultation at Cairo Hospital.

Pain Management Clinic

Understanding Your Pain. Improving Your Everyday Life.

Living with persistent pain can affect your movement, sleep, productivity, and overall well-being.

At Cairo Hospital, our Pain Management Clinic focuses on identifying the causes of acute and chronic pain and developing personalized management plans to support comfort, mobility, and daily function.

Conditions We Assess

Joint Pain

Pain affecting the knees, hips, shoulders, or other joints may result from arthritis, injury, inflammation, or degenerative conditions.

Back and Neck Pain

Spinal discomfort may be associated with muscular strain, degenerative changes, nerve irritation, or other conditions requiring specialist assessment.

Muscle and Tendon Pain

Repetitive strain, sports injuries, and musculoskeletal conditions can cause ongoing discomfort and restricted movement.

Chronic Pain

Persistent pain may require a coordinated approach that addresses physical symptoms, daily function, and rehabilitation needs.

Our Pain Management Approach

Comprehensive Assessment

We begin by understanding your symptoms, medical history, physical condition, and relevant diagnostic findings.

Targeted Treatment Planning

Depending on the diagnosis, your specialist may recommend medication, rehabilitation, appropriate interventional procedures, or further specialist care.

Coordinated Rehabilitation

Individualized rehabilitation may help patients improve mobility, strength, and functional independence.

When Should You Seek Help?

If pain continues, repeatedly returns, limits movement, or interferes with daily activities, a specialist assessment can help identify appropriate next steps.

Take Control of Your Pain Management Journey

Our team supports informed treatment decisions through clear explanations and individualized care.

Start with the right diagnosis. Book your pain management consultation at Cairo Hospital.

BEMER Therapy

A Non-Invasive Approach to Supportive Care

At Cairo Hospital, BEMER Therapy is offered as a non-invasive supportive treatment using pulsed electromagnetic field technology.

BEMER devices deliver low-intensity electromagnetic signals through specialized applicators. Certain devices have specific indications related to temporary local circulation in healthy leg muscles and muscle stimulation.

BEMER is sometimes explored as a complementary approach within musculoskeletal care, although evidence supporting its effectiveness for chronic pain, accelerated healing, and other therapeutic outcomes remains limited.

How Does BEMER Therapy Work?

During a session, the patient is positioned comfortably while a specialized applicator delivers programmed electromagnetic signals.

The treatment does not involve injections or surgical incisions.

Session duration and suitability depend on the device and the supervising healthcare professional's assessment.

Potential Features of BEMER Therapy

Non-Invasive Procedure

BEMER does not require surgery, needles, or injections.

Comfortable Treatment Experience

Sessions are generally designed to be comfortable, although individual experiences may vary.

Supportive Care Option

BEMER may be discussed as a complementary service alongside established medical treatments and rehabilitation.

Personalized Assessment

Patients are evaluated to determine whether the therapy is suitable for their medical circumstances.

Is BEMER Therapy Right for You?

BEMER should not be considered a proven cure for arthritis, chronic joint pain, or degenerative conditions. It should not replace treatments with established clinical benefits.

Patients should inform their healthcare provider about implanted electronic devices, pregnancy, or other relevant medical conditions before treatment.

Explore Your Options at Cairo Hospital

Our medical team can explain the intended role of BEMER Therapy, its limitations, and whether it may be appropriate within your overall care plan.

Discover our supportive care services. Book a consultation at Cairo Hospital.

Physiotherapy

Restore Movement. Rebuild Strength. Improve Your Quality of Life.

At Cairo Hospital, our Physiotherapy and Rehabilitation Centre provides personalized rehabilitation programs designed to improve mobility, reduce pain, and restore physical function.

Using modern rehabilitation equipment and targeted therapeutic exercises, our team supports patients recovering from injuries, orthopedic surgeries, and neurological or musculoskeletal conditions.

Our Physiotherapy Services

- **Orthopedic Rehabilitation:** Supporting recovery following fractures, joint replacement, and orthopedic surgery.
- **Kinetic Rehabilitation:** Improving strength, flexibility, balance, and movement through structured exercises.
- **Pediatric Neuromuscular Rehabilitation:** Supporting children with selected movement and neuromuscular difficulties.
- **Spinal Decompression Therapy:** Providing selected patients with non-surgical spinal traction approaches following clinical assessment.

Why Choose Cairo Hospital?

We combine individualized treatment plans, modern rehabilitation facilities, and professional supervision to support each patient's recovery journey.

Move Better. Live Better.

Book your physiotherapy consultation at Cairo Hospital.

Cupping Therapy

A Complementary Approach to Muscle Relaxation and Recovery

At Cairo Hospital, cupping therapy is offered as part of our complementary physiotherapy services to support patients experiencing muscle tension and musculoskeletal discomfort.

Cupping uses specialized cups to create gentle suction on the skin. It may provide temporary relief from muscle tightness and discomfort, although scientific evidence for its effectiveness remains limited.

Potential Applications

- **Muscle Tension:** May help relieve temporary muscle tightness.
- **Myofascial Discomfort:** Used as a complementary approach for selected soft-tissue complaints.
- **Rehabilitation Support:** May be incorporated into a physiotherapy program when clinically appropriate.

Personalized and Supervised Care

Our team assesses each patient's condition before recommending cupping. Temporary skin marks, bruising, or irritation may occur, and the treatment is not suitable for everyone.

Relax. Recover. Restore Comfort.

Explore cupping therapy at Cairo Hospital.

Acupuncture

Targeted Support for Pain Management and Rehabilitation

At Cairo Hospital, acupuncture is offered as a complementary treatment within our physiotherapy and rehabilitation services.

This technique involves inserting very fine, sterile, single-use needles into specific points on the body. It may help manage certain types of pain and support rehabilitation when combined with appropriate medical care.

Potential Applications

- **Pain Management:** May help reduce certain chronic musculoskeletal pain symptoms.
- **Neuromuscular Support:** May be considered for selected muscle-related discomfort.

- **Rehabilitation:** Can complement physiotherapy and other recommended treatments.

Safe, Professional Care

Our team follows appropriate hygiene and clinical assessment procedures to determine whether acupuncture is suitable for each patient. Temporary soreness or minor bruising may occur.

Find Comfort. Support Your Recovery.

Book an acupuncture consultation at Cairo Hospital.

Obstetrics & Gynaecology

Comprehensive Women's Healthcare

At Cairo Hospital, we provide specialized obstetric and gynaecological care, from routine women's health consultations to maternity services and surgical procedures.

Our services include clinical and surgical gynaecology, dedicated delivery facilities, and consultant-led care supported by experienced MRCOG-qualified specialists.

Your Health. Our Priority.

Book your consultation at Cairo Hospital.

Antenatal Care

Caring for You Throughout Your Pregnancy

At Cairo Hospital, our antenatal care services support mothers and babies throughout pregnancy with regular check-ups, ultrasound monitoring, and personalized medical guidance.

We provide trimester screenings, high-risk pregnancy monitoring, delivery planning, and postnatal support to promote maternal and fetal well-being.

Every Pregnancy Deserves Expert Care.

Book your antenatal consultation today.

Infertility

Personalized Fertility Care for Your Parenthood Journey

At Cairo Hospital, we support couples experiencing difficulties conceiving through comprehensive fertility assessments and individualized reproductive care.

Our services include male and female fertility evaluations, hormonal testing, ovulation induction when appropriate, and personalized treatment planning.

Our specialists guide patients through their available options with understanding, privacy, and professional care.

Your Journey to Parenthood Starts with Understanding.

Book your fertility consultation at Cairo Hospital.

General Surgery

Expert Surgical Care. Personalized for You.

At Cairo Hospital, we provide comprehensive general surgery services focused on treating a wide range of abdominal, gastrointestinal, and soft-tissue conditions.

Our experienced surgical team combines clinical expertise with modern surgical techniques to deliver individualized care, from initial diagnosis to post-operative recovery.

Our Surgical Services

- **Abdominal Surgery:** Surgical management of selected conditions affecting abdominal organs.
- **Hernia Repair:** Open and minimally invasive procedures for different types of hernias.
- **Gallbladder Surgery:** Surgical treatment of gallbladder conditions, including gallstones when intervention is required.
- **Gastrointestinal Surgery:** Procedures addressing selected digestive system conditions.
- **Soft-Tissue Surgery:** Assessment and surgical treatment of certain lumps, cysts, and soft-tissue abnormalities.

Modern Surgical Facilities

Our operating theatres are designed to support sterile surgical procedures, with HE

Endoscopic Surgery

Precision-Focused Care Through Minimally Invasive Techniques

At Cairo Hospital, our endoscopic surgery services use specialized instruments and camera-guided techniques to support the diagnosis and treatment of selected medical conditions.

Endoscopic procedures allow specialists to visualize internal structures and, in appropriate cases, perform targeted interventions without the need for traditional open surgery.

Our Endoscopic Capabilities

- **Diagnostic Endoscopy:** Detailed visualization of internal structures to support accurate diagnosis.
- **Therapeutic Endoscopy:** Selected interventions performed using specialized endoscopic instruments.
- **Minimally Invasive Techniques:** Procedures designed to reduce the need for large surgical incisions where appropriate.
- **Precision-Guided Procedures:** High-definition imaging to support clinical accuracy.

Benefits of Endoscopic Surgery

Depending on the procedure and patient's condition, endoscopic techniques may offer reduced post-operative discomfort, shorter hospital stays, and faster recovery compared with certain open surgical approaches.

Our specialists evaluate each patient individually to determine whether an endoscopic procedure is appropriate.

Advanced Visualization. Personalized Surgical Care.

Book your consultation at Cairo Hospital.

Laparoscopic Surgery

Smaller Incisions. Advanced Surgical Care.

At Cairo Hospital, we offer laparoscopic surgery, a minimally invasive approach that allows surgeons to perform selected abdominal and pelvic procedures through small incisions using specialized cameras and surgical instruments.

This technique may help reduce surgical trauma and support a smoother recovery compared with traditional open surgery in suitable patients.

Our Laparoscopic Surgical Services

- **Laparoscopic Gallbladder Removal:** Minimally invasive removal of the gallbladder when medically indicated.
- **Laparoscopic Appendectomy:** Surgical removal of the appendix through small abdominal incisions.
- **Minimally Invasive Abdominal Repairs:** Selected abdominal procedures performed using laparoscopic techniques.
- **Post-Operative Recovery Support:** Individualized monitoring and guidance to support safe recovery.

Why Consider Laparoscopic Surgery?

For suitable patients, potential benefits may include:

- Smaller surgical scars.
- Reduced post-operative discomfort.
- Shorter hospital stays.
- Earlier return to everyday activities.

Not every condition is suitable for laparoscopic surgery. Our surgical team carefully evaluates each case to recommend the safest and most appropriate treatment approach.

Smaller Incisions. A Personalized Path to Recovery.

Schedule your surgical consultation at Cairo Hospital.

Family Medicine

Comprehensive Healthcare for Every Stage of Life

At Cairo Hospital, our Family Medicine services provide personalized primary healthcare for children, adults, and seniors, focusing on disease prevention, early diagnosis, and long-term health management.

Our medical team supports patients through routine check-ups, preventive screenings, and ongoing care for chronic conditions such as hypertension and diabetes.

Our Family Medicine Services

- **Comprehensive Health Check-ups:** Routine medical assessments to monitor overall health and identify potential concerns early.
- **Chronic Disease Management:** Continuous care and monitoring for diabetes, hypertension, and other long-term conditions.
- **Preventive Healthcare:** Health screenings, vaccinations, and lifestyle guidance to support long-term wellness.
- **Family-Centered Care:** Personalized medical attention for patients across different age groups.

Your Family's Health, Our Priority.

Book your family medicine consultation at Cairo Hospital.

Tropical Medicine

Specialized Care for Tropical and Infectious Diseases

At Cairo Hospital, our Tropical Medicine services focus on the diagnosis, treatment, and prevention of infectious diseases commonly encountered in Nigeria and other tropical regions.

Through clinical assessment and laboratory-supported investigations, our medical team helps patients receive appropriate care for conditions such as malaria, typhoid fever, and other endemic infections.

Our Tropical Medicine Services

- **Malaria Diagnosis & Treatment:** Laboratory-supported diagnosis and appropriate treatment based on clinical findings.

- **Typhoid Fever Management:** Medical assessment, appropriate testing, and targeted treatment for suspected or confirmed infections.
- **Fever & Infectious Disease Assessment:** Evaluation of persistent fever and symptoms associated with tropical infections.
- **Travel Health & Prevention:** Preventive guidance for travelers, including infection prevention and recommended vaccinations.

Why Early Diagnosis Matters

Many tropical diseases share similar symptoms, including fever, fatigue, and body aches. Accurate diagnosis is essential to selecting appropriate treatment and avoiding unnecessary medication.

Expert Care. Accurate Diagnosis. Better Health.

Schedule your tropical medicine consultation at Cairo Hospital.

Herbal Medicine

Natural Wellness Supported by Medical Guidance

At Cairo Hospital, our Herbal Medicine service offers clinically supervised botanical and natural wellness approaches as part of complementary healthcare.

We recognize that some patients are interested in integrating traditional plant-based products with conventional medical care. Our approach emphasizes professional assessment, responsible use, and patient safety.

Our Herbal Medicine Services

- **Botanical Wellness Support:** Assessment of selected plant-based products and their potential role in general wellness.
- **Clinician-Guided Complementary Care:** Personalized guidance on herbal products alongside conventional medical treatments.
- **Integrated Wellness Planning:** Supportive approaches that consider the patient's medical history, lifestyle, and overall health needs.
- **Safety & Medication Review:** Evaluation of potential side effects, contraindications, and interactions between herbal products and prescribed medications.

A Responsible Approach to Natural Healthcare

Natural does not always mean risk-free. Herbal products vary in quality and effectiveness, and some may interact with medications or be unsuitable for certain medical conditions.

At Cairo Hospital, herbal medicine is approached as complementary care rather than a replacement for evidence-based medical treatment.

Natural Wellness. Guided by Medical Expertise.

Book your herbal medicine consultation at Cairo Hospital.

X-Ray & Ultrasound Department

Accurate Imaging. Better Diagnosis.

At Cairo Hospital, our X-Ray & Ultrasound Department provides advanced diagnostic imaging to support accurate diagnosis and effective treatment planning.

Using digital radiography and high-resolution ultrasound technology, we help physicians assess orthopedic injuries, internal organs, and pregnancy-related conditions.

Our Services

- **Digital X-Ray:** Imaging for fractures, joints, chest conditions, and trauma.
- **Abdominal & Pelvic Ultrasound:** Examination of internal organs and pelvic structures.
- **Obstetric Ultrasound:** Monitoring fetal development throughout pregnancy.
- **Diagnostic Reporting:** Timely imaging results to support medical decisions.

Clear Imaging. Confident Care.

Book your imaging appointment at Cairo Hospital.

Laboratory Services

Reliable Testing for Better Health Decisions

Cairo Hospital's in-house laboratory provides automated diagnostic testing to support disease detection, preventive healthcare, and treatment monitoring.

Our laboratory combines modern technology with quality-control procedures to deliver reliable results across different medical specialties.

Our Services

- **Hematology:** Blood counts and blood-related investigations.
- **Clinical Biochemistry:** Kidney, liver, glucose, and metabolic testing.
- **Hormonal Testing:** Hormone assessments and reproductive health investigations.
- **Infection Screening:** Laboratory tests for selected infectious diseases.
- **Quality Control:** Verification procedures to support accurate reporting.

Accurate Results. Informed Decisions.

Schedule your laboratory tests at Cairo Hospital.

Cairo Pharmacy

Trusted Medications. Professional Care.

Cairo Pharmacy, located within Cairo Hospital, provides convenient access to genuine Egyptian and international medications, supported by professional pharmaceutical guidance.

Our pharmacy team helps patients understand their prescriptions and use medications safely and effectively.

Our Services

- **Prescription Dispensing:** Supplying prescribed medications.
- **Egyptian & International Medicines:** Pharmaceutical products from approved supply channels.
- **Medication Counseling:** Guidance on dosage, administration, and precautions.
- **Patient Safety:** Support for appropriate medication use and awareness of drug interactions.
- **On-Site Convenience:** Easy access to medications during hospital visits.

Cairo Pharmacy – Trusted Medicines. Caring Expertise.

Visit Cairo Pharmacy at Cairo Hospital.

Medical Tourism

Your Health Journey Beyond Borders, Guided by Cairo Hospital

At Cairo Hospital, we believe that accessing specialized healthcare should be a well-coordinated and reassuring experience, wherever your treatment takes place.

Our Medical Tourism service connects patients in Nigeria with international healthcare providers in **Egypt, the United Kingdom, the United Arab Emirates, the United States, and Turkey**.

From initial medical consultations and international hospital referrals to travel coordination and post-treatment follow-up, our team supports patients throughout their medical journey.

Our Medical Tourism Services

1. Medical Assessment & Treatment Planning

Your journey begins with a medical consultation at Cairo Hospital, where our specialists review your medical history, current condition, diagnostic reports, and treatment needs.

Based on this assessment, we help identify appropriate international healthcare options for further evaluation or specialized treatment.

2. International Hospital Referrals

We facilitate referrals to selected hospitals and specialist medical centers abroad, including facilities in Cairo and other international destinations.

Our team assists with sharing relevant medical records and coordinating communication with the receiving healthcare provider.

3. Medical Visa & Travel Assistance

International medical treatment often requires careful travel planning. Our support may include:

- Guidance on medical visa documentation and applications.
- Assistance with flight arrangements and travel logistics.
- Coordination of appointment schedules with international hospitals.
- Pre-travel guidance to help patients prepare for their treatment journey.

Visa approvals and travel arrangements remain subject to the relevant authorities and service providers.

4. Pre-Travel Medical Preparation

Before departure, our team helps patients understand their medical requirements, organize necessary documentation, and prepare for their scheduled consultations or procedures abroad.

5. Post-Treatment Follow-Up in Abuja

Your healthcare journey does not necessarily end when you return home.

Cairo Hospital provides post-return medical assessment and follow-up support in Abuja, coordinating with the treating specialists when appropriate.

Depending on the patient's condition, follow-up may include medical reviews, recovery monitoring, and rehabilitation guidance.

Why Choose Cairo Hospital for Medical Tourism?

- **International Healthcare Access:** Referrals to medical providers across multiple countries.
- **Coordinated Patient Support:** Assistance throughout the referral and travel preparation process.
- **Medical Expertise:** Clinical guidance to help patients make informed treatment decisions.
- **Continuity of Care:** Local follow-up support after returning to Nigeria.
- **Personalized Experience:** Individual attention to each patient's medical and travel needs.

Your Journey, Our Commitment

Whether you are considering specialized surgery, advanced diagnostics, or treatment unavailable locally, Cairo Hospital helps you explore international healthcare options with professional guidance and coordinated support.

From Abuja to International Healthcare — And Back to Trusted Care.

Contact Cairo Hospital today to discuss your medical tourism needs and schedule your initial consultation.
